About

2 years of overall experience, primarily in Telecom domain, as Data Analyst. Skilled in Power BI, Python, SQL and Machine learning. Relevant knowledge of Agile methodology.

Skills

- Data Visualization (Power BI,Tableau)
- Python
- Machine Learning
- SQL
- Data modelling

Education

B.E Computer Science (8.51/10)   2015-19

Certifications

 Programming, data structures and Algorithms using Python(NPTEL, IIT M)

 SQL Intermediate(HackerRank)

 Power BI masterclass (Udemy)

Work Experience

Tata Consultancy Services   July 2019 – Present
Data Analyst
- Delivered multiple reports/dashboards using Power BI for a telecom client.
- Owned the project from scratch till end. Maintained the life cycle
- Developed multiple POC's for client requirement.
- Achieved 50% time reduction in report refresh in Power BI Service using efficient data modelling.

Recent projects

Imagemagik
Developed a Python based project to extract text from Image using **Pytesseract, cv2** and **PIL(python Imaging Library)** and tested on heavily noised images.

Finance Reports(Power BI)

Designed a Power BI report to track the financial transaction and **VAT** report for the audit purpose for the client. Deployed in production and automated the report refresh process. Implemented various **KPI's** and charts/tables according to client requirement. Handled **ad-hoc issues** and maintenance.

Customer Success- Operations report(Power BI)

Developed a **Power BI** report from scratch gathering data from on-premise database using **SQL** queries , creating multiple dashboards and KPI's according to the client requirement. Took ownership of the entire project and deployed in dev and production servers. **Automated** the report refresh process by setting **gateway** in power BI service.
